

Milestone 5

Stand-Up Meeting:

1. What did I accomplish since the last standup?
2. What do I plan to work on by next standup?
3. What are the obstacles or impediments that are preventing me from making progress?

Sara

1. Connecting Server
2. Designing the Results Page and Connects page. Determining which data is necessary to show visually.
3. Obstacles/impediments: Hard to implement new databases. Working with Jackson to determine how the databases were constructed

Jackson

1. Helped contribute to connecting the client side to the server side
2. Added professors' names to the CourseRating table
3. Role as administrator of Google Cloud Console - adding IPv4's to grant connection access to other users
4. Next week
 - a. I will look through the rest of the FCQ data to determine what else will be useful to us
 - b. Continue role as administrator of Google Cloud project
 - c. Continually update EER Diagram on Drive folder with updates to the database

Tim

1. Introduce the group
2. Talk about our website and what we have for now
3. Try to work on the final result page, maybe ask help from Jackson

Rhith

1. Introduce the plan for UI design going forward.
2. Plan the usage of AJAX live search from a UI perspective
3. We need to organize and design the results page, and the results of the results page

Igor

1. Introduce the UI design page
2. Develop the Ajax live search for the search page
3. Will design for the results page and the final result page

Alec:

1. Built and connected the search engine using regex and mysql queries.
2. Build a results page that displays courses similar to the user's search query
3. Created a content page which displays a dynamically loaded pie chart of grade distribution.
4. Need to add more charts and graphs and also make the site look better maybe strengthen the search engine to take course subject and course number.
